Proposal Development Support (PDS) Program

The Vice Chancellor for Research is allocating funds to support the development of large collaborative grant proposals with the goal to facilitate the submission of highly competitive funding requests to federal agencies.

PDS funds shall specifically facilitate the submission of large collaborative grant proposals with minimum proposed budget of $1,000,000 coming to SIUC (i.e. excluding subcontracts) and carrying full F&A (exceptions will be considered), and a minimum of three participating PIs from SIUC. The maximum level proposal development support shall be $15,000. We intend to support at least 5 research teams through the PDS program, depending on the number and quality of proposals received.

PDS is specifically designated to support the proposal development process. PIs can request PDS to cover a variety of expenses that may arise during the Pre-Submission phase. Examples of expenses for which PDS funds may be requested include, but are not limited to:

- Travel support to facilitate meeting external collaborators or funding agencies;
- Acquisition of consumables or use of equipment and facilities to generate preliminary data;
- RA or postdoc support

PDS funds may not be used for faculty or staff salaries.

PDS requests must be submitted by December 1, 2023 and must include the following:
  a. A detailed abstract / summary of proposed research activities (maximum 5 pages);
  b. A detailed description of the research team, identifying the role of each investigator (maximum 2 pages);
  c. Intended funding agency and corresponding RFP or grant announcement for future proposals that will be generated through the work supported by PDS:
     a. Intended submission timeline and size of estimated budget (no budget detail necessary);
  d. Detailed PDS budget (PDS duration is 6 months: January 15, 2024-July 15, 2024);
  e. Justification of PDS budget;
  f. Current resumes of all PIs
Review/selection criteria:

a. A review committee/panel comprised of 3-5 members;
b. A recommendation of funding (either “recommend” or “not recommend”) will be submitted to the VCR who will make the final decision based on reviews and available funding;
c. Review will weight on each of the following criteria:
   I. Results of previous PDS funding (if applicable);
   II. Significance and innovation of the proposed research;
   III. Feasibility: PIs, facilities, targeted research agency and project;
   IV. Adequacy/utility of items for which PDS is requested;

Two PDS awards will be set aside for faculty who present or have a poster during the Research Discovery Workshop (more PDS awards may be possible for Research Discover Workshop attendees based on reviews and availability of funds).

PDS funding will start January 15, 2024 and will cover expenses until July 15, 2024.

Note: To create continuous support for the PDS program, faculty who receive PDS funds and who are successful in receiving awards through proposals that were made possible through PDS support, will allocate their 4% F&A return to a PDS fund to support future investigators.
