This workshop will provide an opportunity for junior faculty to become acquainted with the NSF Faculty Early Career Development Program (CAREER). The CAREER Program offers the National Science Foundation's most prestigious awards in support of junior faculty who exemplify the role of teacher-scholars through outstanding research, excellent education, and the integration of education and research within the context of the mission of their organizations.

Interim Vice Chancellor for Research and Professor of Analytical Chemistry Dr. Gary Kinsel and Professor of Chemistry and Biochemistry and Interim Associate Dean of the College of Science Dr. Boyd Goodson, who have both served on numerous review panels including the CAREER and are both former CAREER recipients, will provide insight on how to craft a proposal and address frequently asked questions.

Must meet all of the eligibility criteria as of the annual deadline:

- Hold a Doctoral Degree in an NSF-supported field
- Be untenured and be employed (50%+) in a tenure track position as an assistant professor or equivalent
- Have not submitted more than twice previously and have not previously received an NSF PECASE or CAREER award; can be an NSF recipient in other programs
- Work in a discipline normally funded by NSF

Register for the workshop at: [https://ospa.si.edu/apply/nsf-career-registration.php](https://ospa.si.edu/apply/nsf-career-registration.php)

Please register one week prior to the scheduled workshop.
